

MILO MILA

by Paolo Cappello

Milo e Mila sono due tavolini taglienti contro i cliché: alle lavorazioni tondeggianti in terracotta, hanno preferito un profilo decisamente geometrico e a tratti irregolare. Fanno da eco al radical design anni 60, piacevolmente eccentrici anche nella monomatericità.

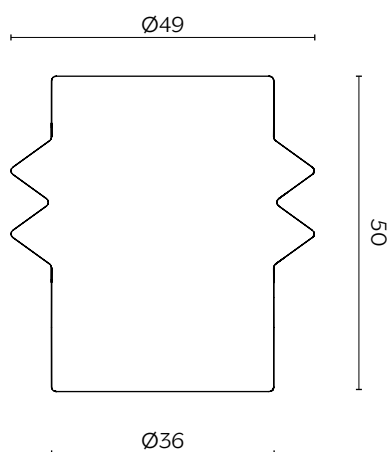

Milo and Mila are coffee tables with sharp edges that goes against the grain: instead of the usual rounded terracotta forms, they opt for a decidedly geometric and occasionally irregular profile. Echoing the radical design of the 60s, they are pleasingly unique even in their commitment to a single material.
